

ECOFRAME

FROM BIRTLEY BUILDING PRODUCTS

ECOFRAME FROM BIRTLEY BUILDING PRODUCTS

Birtley Building Products provides Ecoframe - the eco friendly door frame for composite doors for the social housing and new build market.

This exclusively designed frame has been produced for use with UK 44mm door slabs and has a positive location for Winkhaus lock keeps which allows for fast and accurate installation.

RECYCLED MATERIAL

Designed by Winkhaus UK and manufactured in Germany, the Ecoframe fulfils the Governments environment criterias and ideally suits the Winkhaus Cobra range of multi-point locking systems, which are widely specified in both the social and private housing sectors.

DOOR FRAME SOLUTION

The patented designed frame is ideally suited to both social and new build applications, and is quick and easy to install.

Its aluminum white power coated skin guarantees colour fast, and is available in RAL 9016 white powder coat only.

The outerframe is made from aluminium skins with recycled materials as the core (polypropylene, polyurethane, paper and aluminium). Typically these are recycled from plastic shopping bags, plastic bottles and aluminium cans.

The 70mm Ecoframe can be coupled with PVC-U frames for sidelights. It is also compatible with aluminum low threshold systems.
